WORK PROFILE

Project on Django framework	<p>Blog project based on Django framework. I have done this project during my training on Python and Django. This project deals with the writing the blog on something. User can write something about the particular subject and he can upload it. If reader wants to send message to the user/blogger regarding the uploaded blog, reader can also do that, where the "Reply" field is specified in that particular webpage. This is how blog project is designed. This is the brief explanation about Blog project.</p> <p>Apart from this Blog project I have done two mini-projects on FBV and Model-Forms.</p>
-----------------------------	---
